This is the first paragraph with some content to fill space on the first page. Let me add more text to make this substantial.

Here's another paragraph with more content. We want to fill up the page so we can test what happens when headers appear at the bottom.

Some content under this header.

More content to fill the page. This paragraph should help push the next header toward the bottom of the page.

Let me add even more content to ensure we get close to a page break. This is important for testing the orphan header detection.

Another paragraph of content. We need enough text to fill most of a page so the next header will be pushed to the bottom.

Here's more text to fill space. The goal is to create a situation where a header appears at the very bottom of a page with little or no content following it.

More filling text. This should help create the scenario we want to test.

Additional content to push us closer to a page boundary.

Even more content to ensure we're near the bottom of the page.

This is just a tiny bit of content after the header.

Very little content here too.

Final paragraph with just a bit of text.

The end.
